## SPOT Hosted Email Archiving - easy to preserve, protect, & recover your email

### Storage and capture features

Email Archiving automatically captures and stores every email received by every mailbox that has activated this service.

- 100% capture across all devices
- Includes Exchange, IMAP and POP platforms
- Full indexing and extraction of more than 400 different file types
- Archived data is housed in tamper-proof systems in eight disparate datacenters (separate from our Exchange datacenters)
- Our datacenters are SSAE 16 audited, ISO 27001 and PCI compliant, and FISMA Moderate certified
- Unlimited storage & unlimited scalability

### Security features

Record authenticity and preservation is key to meeting compliance and eDiscovery mandates. Email Archiving protects from loss, corruption, damage or misuse.

- FIPS-certified AES 256-bit encryption of stored data
- Data is encrypted in transit and at rest
- WORM-compliant tamper-proof media
- FISMA-compliant geo-replicated datacenters
- No co-mingling of data—data is stored in individual silos to prevent corruption
- 99.999999999% data resiliency assures the integrity of your stored emails

### Search and restoration features

Email Archiving ensures your messages are always available to quickly search, identify and recover.

- Three different search methods
- Search full text of all email and attachments
- Tagging capabilities let you identify content accurately and quickly
- Implement a "legal hold" to identify, segregate and preserve relevant data
- Search across every mailbox in your account
- Recover messages back to administrator's mailbox
- Categorize results before export

### Admin and end-user features

For both users and administrators, Intermedia's Email Archiving offers an easy-to-use integrated experience.

- Access admin and searching features via your control panel
- Grant different levels of accessibility and permissions
- No hardware or software licenses to buy
- Build reports based on archive activity
- Keep records immutably stored regardless of any attempts to alter or delete them
- Extend end-user archive access through our online portal or within Microsoft Outlook
