SPOT Cloud Drive
Making working remotely easier

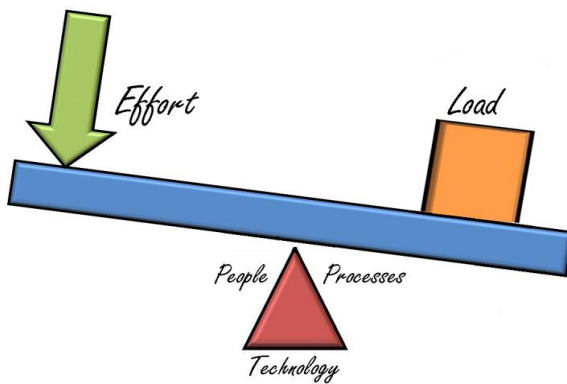

THE FULCRUM GROUP
One Technology Solution: Yours

SPOT Cloud Drive is a cloud file sharing solution that allows businesses of any size to share files and network drives with any device anywhere, all while retaining full control over your data.

With today's distributed workforce, users need access to company files and data anywhere, anytime, with any device. Free cloud solutions like Drop Box, although handy, may not meet your organization's need for data security and accountability.

The Fulcrum Group is your partner in both affordable small/medium business IT support and the long-term success of your business.

**PEOPLE + PROCESSES + TECHNOLOGY
= THE FULCRUM GROUP DIFFERENCE**

Our SPOT Cloud Drive Solution features:

- 256 bit encryption, ensuring that your files are secure.
- Fully HIPAA Compliant.
- The ability to share files and collaborate via email, web sharing, team shares, and network drives.
- Full control access with user and group permissions and Active Directory integration.
- Management by your IT, with full visibility of all data.
- Control and limiting of data leakage.
- No extra charges for file backup of desktop and laptop computers.
