SPOT Cloud Email Filtering
Making Cloud Easier for SMBs

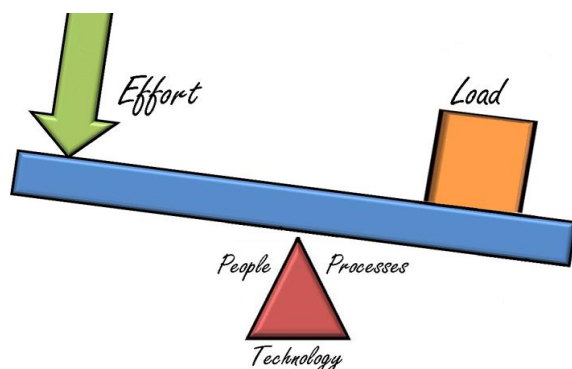

THE FULCRUM GROUP

One Technology Solution: Yours

SPOT Cloud Email Filtering powered by McAfee SaaS is a Security-as-a-Service (SaaS) email security solution that is always on, always up-to-date, and requires no additional hardware or software investment, nor any extra time and resources to maintain.

Our SPOT Cloud Email Filtering solution stops spam and email-based threats before they infiltrate your network, greatly reducing the load on your email, saving you valuable bandwidth and server storage. And The Fulcrum Group Help Desk is never more than a phone call away to help.

The Fulcrum Group is your partner in both affordable small/medium business IT support and the long-term success of your business.

**PEOPLE + PROCESSES + TECHNOLOGY
= THE FULCRUM GROUP DIFFERENCE**

Our SPOT Cloud Email Filtering Solution powered by features elements including:

McAfee®
An Intel Company

- Fierce Email Security – powered by McAfee Global Threat Intelligence.
- ClickProtect – helps you eliminate threats from embedded URLs within an email message.
- Superior Spam Protection – McAfee's spam detection system applies multiple layers of analysis to reduce incoming spam without blocking legitimate email.
- Triple Layer Virus Protection -.Inbound and outbound emails are triple-filtered to protect you against viruses and worms.
- Prebuilt Content Filtering Rules – Prevent compliance issues and data leaks helps you stay in compliance with PCI, healthcare, and financial data rules.
- Email Continuity – In the event of a mail server outage, SPOT Cloud Email Filtering spools your email in the cloud, and gives your users the ability to send and receive email from their SPOT Cloud Email Filtering User Quarantine Portal.
