Resolve To Work Smarter in 2014 With SPOT Cloud Drive

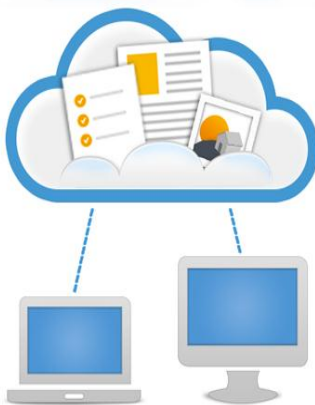

The Cloud. We hope you're not weary of hearing this terminology thrown around in tech-land because the value Cloud technologies in general offer small business (and file storage/ sharing/synchronization, in specific) is well worth your consideration.

WHY IS BEING IN THE CLOUD SO IMPORTANT THESE DAYS?

A good definition of Cloud computing is, very simply, computer services delivered via the Internet.

Different categories of services are offered to meet specific needs, but if you've used DropBox, Box, SugarSync or any other online file storage/sharing/synchronization applications over the Internet to easily share files with others, you're already participating in file sharing via The Cloud.

Our workplace culture is evolving. Perhaps more of your own employees are on the road.

Or your organization may offer the opportunity for some to telecommute.

In any case, a more distributed workforce is becoming the norm.

A traditional network may not suit the needs of organizations composed of such a mixed dynamic. Cloud file sharing services address this need enabling people to work anywhere, anytime – and at nominal cost.

The Fulcrum Group offers Cloud file sharing services in the form of our SPOT Cloud Drive Service.

TOP BENEFITS OF SPOT CLOUD DRIVE

- **Share Your Files Without Requiring VPN**

Accessing network shares and files via VPN can be cumbersome and slow. And your users are likely to need access to files at times when there isn't available technical support to help them troubleshoot VPN issues. Not to mention slow speeds when accessing files over VPN. SPOT Cloud Drive synchronizes your files right to your local PC or laptop, so you have fast, real-time access to your files.

- **Share Your Files SECURELY**

SPOT Cloud Drive is integrated with Microsoft Active Directory, so you set and revoke permissions as needed.

- **Data Control**

SPOT Cloud Drive provides your company's IT department with the ability to control data leakage, have full visibility and control over your company's data, and at the same time, ensures your company's data is protected and doesn't fall into the wrong hands.

- **Access Your Files via MOBILE Devices or Web Browser**

Have an Apple iPhone or Android smart phone? With SPOT Cloud Drive, you can open and even modify your files stored in SPOT Cloud Drive. Or login to SPOT Cloud Drive web portal from any computer and access your files. This gives you "anytime, anywhere, any device" access to your critical files.

If you would like to find out how your business can work smarter with SPOT Cloud Drive, we'd be happy to assist you. Contact your Fulcrum Group Account Manager, or email us at info@fulcrumgroup.net.
