|--|-----------------------------|--------------------------------------|--|---|
| | Storagecraft | | No products of Arcserve and StorageCraft, an Arcserve company are vulnerable to CVE-2021-44228 because they don't use the Log4j versions identified as being at risk | https://www.arcserve.com/insights/critical-apache-log4j-vulnerability-found-in-logging-framework/ |
| | Synology | | CVE-2021-44228 only affects products equipped with log4j 2 | https://www.synology.com/en-global/security/advisory/Synology_SA_21_30 |
| | Ubiquiti | Look like controller has some issues | Report not affected | https://community.ui.com/releases/UniFi-Network-Application-6-5-54/d717f241-48bb-4979-8b10-99db36ddabe1 |
| | Unitrends | | Report not affected | https://helpdesk.kaseya.com/hc/en-gb/articles/4413449967377-Log4j2-Vulnerability-Assessment |
| | Veeam | | Apache Logs4j is not in use by any Veeam products. | https://www.veeam.com/kb4254 |
| | Vmware | vCenter appliance patch pending | ESXi, Skyline collector, VMware Tools | https://www.vmware.com/security/advisories/VMSA-2021-0028.html |
| | WordPress (websites) | | | WordPress, plugins and themes are using PHP as server side language. log4j is a component for Java servlets. Its another programming language and it is not used in WordPress ecosystem (except maybe some very exotic integration plugins that word together with PHP and Java, but its very unlikely case) |
